Data Analyst and ICT Support Technician with 3+ years of experience transforming complex data into actionable business insights and improving operational performance. Proven success in reducing analysis turnaround time by 30%, improving data-processing efficiency by 15%, and maintaining 100% data accuracy across high-volume datasets. Skilled in Python, SQL, Power BI, ETL pipeline, R, and data validation, delivering reliable insights that support faster, data-driven decisions.

SKILLS

Soft skills

• Documentation • Ticket Logging & Tracking • Stakeholder Communication • User-centric Mindset • Reporting

Technical skills

• Python • SQL • R • ETL • MS Excel • Google Sheets • Power BI • Tableau • Github • Jira • HTML/CSS • Streamlit • BRD • Statistics Analytics • Vibe Coding • KPI Reporting • Data Warehousing • REST API • Data Modelling • Database Management • Data Validation • Dashboard Development • Troubleshooting • Networking Fundamentals • Hardware & Software Support

WORK EXPERIENCE

ICT Support Technician – Academies Australasia Polytechnic Pty Limited, Melbourne VIC May 2025 – June 2026

- Provided Level 1 ICT support for 40–60 staff and students weekly, troubleshooting Windows/macOS environments, user accounts, software installations, and endpoint configuration issues with strong first-contact resolution.
- Resolved network and connectivity incidents involving Wi-Fi, LAN, IP configuration, and application access through structured troubleshooting and diagnostic testing, reducing average resolution time by approximately 25%.
- Collaborated with senior ICT technicians to develop a network monitoring dashboard for Wi-Fi, LAN, and access point performance, improving visibility into device status, connectivity trends, and infrastructure decisions.

Operation Support Officer – Victorian Curriculum & Assessment Authority, Coburg VIC Sep 2023 – Dec 2024

- Processed and validated high-volume structured and semi-structured datasets, handling 10,000+ records per cycle using database-driven workflows and system-controlled data pipelines within strict SLAs.
- Performed structured QA/QC checks to ensure completeness, consistency, and audit readiness, referential integrity checks, and controlled updates across relational data tables.
- Optimized end-to-end data-processing workflows by introducing automation and system-level controls, resulting in a 15% reduction in processing time while maintaining 100% data accuracy and audit readiness.

Data Analyst – Can Tho University, Vietnam Oct 2021 – Dec 2022

- Developed financial models, portfolio dashboards, and EDA workflows to analyze economic and sentiment factors, supporting investment decisions during COVID-19 market phases.
- Built and optimized end-to-end ETL pipelines using Python, Stata, and Excel; applied machine learning models and Power BI dashboards to generate actionable portfolio insights.
- Improved analysis turnaround time by 30%, contributed to investment strategies generating 20% profitability (~AUD 20,000), and the publication of 2 research articles.

PROJECT

SAS Curiosity Cup 2024 – La Trobe University Energy Consumption Analysis [Github](#)

- Topic: Energy Consumption Analysis
- Tools: SAS Viya, Jupyter Notebook, Machine Learning Modelling, EDA, Predictive Analysis, Github.
- Results: Rank 17/107 globally (overall score)

Commercial Bank Data Warehousing Project [Github](#)

- Topic: Financial Analysis
- Tools: SQL, Python, ETL pipeline, Power BI, Github.
- Results: A centralized analytics platform (dashboard) to improve client profiling, marketing, and risk management.

EDUCATION

La Trobe University, Master of Business Analytics – Data Science Feb 2023 – Dec 2024

Can Tho University, Bachelor of Finance and Banking Sep 2018 – Jul 2022
