

CHAN TANG

tangchanthieng@gmail.com | +61 404 858 011 | [LinkedIn](#) | [Github](#) | [Portfolio](#)

Data Analyst with 3+ years of experience transforming complex data into actionable business insights and improving operational performance. Skilled at reducing analysis turnaround, delivering data-processing efficiency while maintaining data accuracy across high-volume data sources. Looking to transition into database management, data engineering, and project collaboration roles.

SKILLS

Soft skills

Documentation • Stakeholder Communication • User-centric Mindset • Reporting

Technical skills

Python • SQL • R • Stata • HTML • Bash • Power BI • Tableau • Looker Studio • Streamlit • Dashboard Development • KPI Reporting • MS Excel • Google Sheets • ETL/ELT • EDA • REST API • n8n • Git • Jira • Data Warehouse • Data Validation • Machine Learning • Statistics • Networking Fundamentals • Hardware & Software Support • Troubleshooting • Active Directory • Ticket Logging

WORK EXPERIENCE

ICT Support Technician – Academies Australasia Polytechnic Pty Limited, Melbourne VIC | May 2025 – Jun 2026

- Provided Level 1 & 2 ICT support for 40–60 user endpoints weekly via troubleshooting Windows/macOS environments, user accounts, software & hardware installations, and endpoint configuration issues with 70% first-contact resolution.
- Resolved network and connectivity incidents involving Wi-Fi, LAN, IP configuration, and application access through structured troubleshooting and diagnostic testing.
- Collaborated with senior ICT technicians to set up a local network server for tracking Wi-Fi, LAN, and access point performance, reducing average resolution time by approximately 40%.

Operations Support Officer – Victorian Curriculum & Assessment Authority, Coburg VIC | Sep 2023 – Dec 2024

- Processed and validated high-volume structured and semi-structured datasets, handling 10,000+ records per cycle using database-driven workflows and system-controlled data pipelines within strict SLAs.
- Performed structured QA/QC checks to ensure completeness, consistency, and audit readiness, referential integrity checks, and controlled updates across relational data tables.
- Optimised end-to-end data-processing workflows by conducting automation and system-level controls, resulting in a 15% reduction in processing time while maintaining 100% data accuracy and audit readiness.

Data Analyst – Can Tho University, Vietnam | Oct 2021 – Dec 2022

- Built and optimised end-to-end ETL pipelines, performed EDA using Python, Stata, and Excel; developed financial models and Power BI dashboards to generate portfolio investment insights based on economic and sentiment factors.
- Improved analysis turnaround time by 30%, contributed to investment strategies that yielded ~AUD 20,000 (20% profitability) and the publication of 2 research articles.

PROJECT

SAS Curiosity Cup 2024 – La Trobe University Energy Consumption Analysis | [Github](#)

- Collaborated with project members using Agile/Scrum framework to build an end-to-end data-processing, EDA, and modelling pipeline using MS Excel, Jupyter Notebook, and SAS Viya that analyses La Trobe campus energy consumption (water, electric, gas) across buildings and departments over time.
- Documented insights & recommendations for Net Zero Emissions goal and achieved global rank 17th in the competition.

Commercial Bank Data Warehousing Project | [Github](#)

- Designed a Medallion architecture analytics solution including data ingestion, data warehousing, ETL pipeline, data validation, SQL queries, Python-based analysis, and Power BI dashboard development to improve client profiling, track marketing campaigns, and perform risk management.
- Tech stacks: Python, SQL Server, Power BI, MS Excel, Git

EDUCATION

La Trobe University, Master of Business Analytics – Data Science | Feb 2023 – Dec 2024

Can Tho University, Bachelor of Finance and Banking | Sep 2018 – Jul 2022
